The Maharashtra State Board of Technical Education has adopted the policy of designing the curriculum based on the scientific principles since 1995.

- As a part of curriculum implementation, the student assessment norms have been implemented.
- The curriculum mainly focuses on professional and generic skill development in students and meeting the desired quality of teaching, learning and management. This needs redesign of whole education process and to plan the activities at various levels such as institution, department, and teacher level on regular basis.
- The Heads of Institutions are required to perform various functions to manage the change along with their routine activities.
- The Curriculum Implementation and Assessment Norms (CIAAN) are prepared for ensuring the effective curriculum implementation.
- The norms are focused on the progressive assessment of the student. However, this also provides feedback at regular intervals to the teachers.
- This will also be helpful to the institutions to manage the resources effectively and efficiently.
- It is expected that this will bring uniformity in the curriculum implementation and student assessment to meet the objectives.

Approach for Curriculum Implementation

The MSBTE has designed its curriculum by adopting Systems Approach. The same approach has been considered while considering Curriculum Implementation. The salient features from the diagram are as follows. The customer of the system is industry and community that requires competent technical manpower. In order to produce the desired output, curriculum implementation process should be well planned and executed. The diagram shows sequential learning process, from state level planning to students' meaningful learning. To carry out the educational processes, the enabling processes have been identified as shown in the diagram. To ensure effective curriculum implementation, the management structure has been proposed under the control of MSBTE such as RBTE, RCC, ICIU, EAMC and IAMC. The mechanism proposed will ensure the quality of the processes. This will be achieved through the monitoring carried out by EAMC and IAMC. The diagram shows the output of this process. In order to ensure improvement in Teaching-learning process and quality of output, the systems approach is most appropriate.

✚ Placement Facilities

The goal of Training & Placement Cell is to provide students with a platform for using their potential to gain valuable experience by working in industry; it also acts as the interface between various companies seeking talented young diploma engineers in various disciplines. The Cell is well equipped with ample infrastructure in Terms of

spacious Interview cabins, Conference Hall for Pre-Placement Talk, Presentations etc.

Training

Maharashtra State Board of Technical Education, Mumbai always supports the institute. The cell arranges Industrial Training of 6 weeks at the end of Diploma 4th Semester examination for students. The importance of Soft Skill in getting the Job/starting own Enterprise is remarkable; considering these artifacts; the cell organizes “Soft Skill Training” in collaboration with well-known companies in Maharashtra.

Placements

Various reputed industries visit the institute for campus recruitment. The Institute provides all necessary facilities for conduction of campus drive in systematic manner. The institute invites the students from nearby Polytechnics to be part of “Pool Campus” which helps recruiters to select from a good chunk of students. For participating in the placement drive students have to fill the undertaken form as designed by the institute at department level to check their preferences count for appearing campus interviews or for higher studies.

The following table shows the summary of placement activity.
